

GO AHEAD, WE'LL WAIT...

...AND WAIT AND WAIT!

If you're still using metal tab collars and bending back all those tabs (45 tabs on a 12") then you are spending much more time than you need to. DuraTite Systems has a UL classified, self sealing trunk line take off that eliminates the time consuming tabs, saves your fingers and seals virtually air tight without extra mastic and tape. Ask your preferred distributor or visit our web site for a FREE sample.
